## **IV: Investment Objectives, Strategies, Restrictions and Practices**

### **1. Investment Objectives**

The investment objective of the Scheme is to produce capital growth. Investment will be made primarily in Emerging Markets equity funds. Cash or near cash may be held as necessary in order to enable units to be redeemed or for the efficient management of the Scheme in accordance with its objective.

### **2. Investment Strategies**

The Scheme will invest primarily in a diversified group of registered foreign open-ended Funds that, in turn, invest principally in Emerging Markets equities. Investments will be made in approximately four to six underlying funds that the Manager believes will advance the objective of the Scheme.

The Manager will select Underlying Funds for investment using a process involving quantitative and qualitative factors that is designed to determine how well the Underlying Fund represents its asset class. Similarly, the Manager will redeem or sell the Scheme's investment in an Underlying Fund if the Manager determines that there is a better alternative selection and/or if revised economic forecasts or interest rate outlook requires a repositioning of the portfolio.

Factors taken into consideration by the Manager in the selection process will include among other things, the Underlying funds' objectives, policies, strategies, performances, and management styles as well as their overall operations (such as size, fees and expenses, and services).

The percentage weightings of each Underlying Fund are targets that may be adjusted at the Manager's discretion although; restrictions laid down in the Trust Deed apply.

When the Manager believes market conditions are unfavorable or when suitable investments are not otherwise available, the Scheme may invest any amount in cash, cash equivalents, high-quality, short-term debt securities and, money market instruments as a temporary defensive position. The Scheme's investment objective may not be achieved while it is invested in a temporary defensive position.

### **(1) Investment Restrictions**

The Fund undertakes not to:

(i) Purchase a security, other than a debt security issued by the Government of Mauritius or the government of any other country, if, immediately after the purchase, more than 25% of the net asset value of the NIT Emerging Markets Fund, taken at market value at the time of purchase, would be invested in securities of that issuer;

(ii) Purchase a security of an issuer where, immediately after the purchase, NIT Emerging Markets Fund would hold more than 10% of a class of securities of that issuer;

(iii) The value of the aggregate values of any investments in the shares of a collective investment scheme shall not exceed 25% of the net asset value of the NIT Emerging Markets Fund;

(iv) The nominal amount of any investment made in another collective investment scheme shall not exceed 10% of the shares issued by that collective investment scheme.

(v) Purchase real estate;

(vi) Purchase a mortgage;

(vii) Purchase a Security for the purpose of exercising control or management of the issuer of the security;

(viii) Purchase an illiquid asset if, immediately after the purchase more than 10% of the net assets of the NIT Emerging Markets Fund, taken at market value at the time of the purchase, would consist of illiquid assets;

(ix) Purchase or sell derivatives except, within the limits established by the Commission or, in the case of a specialized fund authorized by the Commission;

(x) Purchase or sell a physical commodity, including precious metals, except in the case of a specialized CIS authorized by the Commission.

### **3. Investment Practices**

The Scheme undertakes not to:

- i. borrow money or provide for the creation of any encumbrance on its assets except in the two following situations:
- ii. subscribe securities offered by a company under formation;

- iii. engage in the business of underwriting or marketing securities of any other issuer;
- iv. lend money, securities or other assets;
- v. guarantee securities or obligations of another person;
- vi. purchase or sell securities other than through market facilities where these securities are normally bought and sold unless the transaction price approximates the prevailing market price or is negotiated on an arm's length basis;
- vii. the transaction is a temporary measure to accommodate requests for the redemption of securities of the collective investment scheme (CIS) while the CIS effects an orderly liquidation of its assets, and, after giving effect to the transaction, the outstanding amounts of all borrowings of the CIS does not exceed 5% of the net assets of the CIS taken at market value at the time of borrowing; the encumbrance secures a claim for the fees and expenses of the custodian or a sub-custodian for services rendered in that capacity;
- viii. purchase a security from, or sell a security to, one of the following persons:
  - the CIS manager or the custodian;
  - an officer of the CIS manager or the custodian;
  - an affiliate of a person referred to in the above two subparagraphs, unless the purchase or sale to the affiliate is carried out at arm's length.

## **(2) Risk Factors**

- The assets of the Scheme will be invested principally in other Funds, so the investment performance and risks of the Scheme are directly related to the investment performances and risks of the underlying funds held.

The risks of the underlying funds include market risk (which is the risk that a particular asset class in general may fall in value), interest rate risk (which is the risk that the value of an underlying fund's portfolio will decline because of rising market interest rates), income risk (which is the risk that the income from an underlying fund's portfolio will

decline because of falling market interest rates), credit risk (which is the risk that an issuer of a debt security is unable or unwilling to meet its obligation to make interest and principal payments in a timely manner), inflation risk (which is the risk that the value of assets or income from investments will be less in the future as inflation decreases the value of money) and, to the extent that the Scheme will invest in underlying funds that invest in foreign securities, foreign investment risks (which include certain risks that are not typically associated with investing in domestic securities, such as changes in currency rates and political developments).

The Scheme may also bear the risks that the underlying funds may not perform as well as the general market and that the value of the Scheme's assets and income from investments may decrease as inflation increases. The ability of the Scheme to meet its investment objective is directly related to the ability of the underlying funds held to meet their objectives as well as the allocation among those underlying funds. There can be no assurance that the investment objective of the Fund or any underlying fund will be achieved.

- A basic risk associated with the Scheme relates to the emphasis placed on the judgment of the Manager in assembling the portfolios of underlying funds. The reliance on the Manager's judgment exposes the investor to the risk that the Manager could be incorrect in its evaluations and assumptions and as a result may make allocation decisions that may not prove profitable.

- The Scheme and the underlying funds will have transactional and operating expenses. An investor in the Scheme will bear not only his or her proportionate share of the Scheme's expenses, but also the similar expenses of the funds in which the Scheme invests.

- The value of the underlying funds' investments, and net asset value ("NAV") of both the underlying funds' and the Scheme, will fluctuate in response to changes in market and economic conditions, as well as the financial condition and prospects of issuers in which the underlying funds invest. The performance of each underlying fund also will depend on whether the underlying fund's investment adviser is successful in pursuing the underlying fund's investment strategy.

However, no unit in the Fund shall confer any interest in any other fund constituted under the NIT Unit Trust.

The units will be denominated in Mauritian Rupees.

On purchase and redemption of units in the Funds, the Manager will make an entry in the register of unitholders and, a contract note will be issued which is the definitive evidence of holding in the Funds.

Unitholders of the Funds are entitled to the following rights, amongst others:

- (i) Distribution of income
- (ii) Liquidation rights
- (iii) Meeting of unitholders
- (iv) Redemption / repurchase
- (v) Switching

The above rights of the unit-holders can be modified:

- (a) by either the Trustee, when it is of the opinion that this is necessary to comply with the provisions of any statutory authority or to correct a manifest error; or
- (b) by way of an 'Extraordinary Resolution' passed at a meeting duly convened and carried by a majority of not less than three-fourths of the unit-holders; or
- (c) where such modification is otherwise expressly authorised by the Trust Deed.

## **(2) Contractual Plans**

### **1. Minimum Initial Investment and Holding**

The minimum initial investment which may be made in this Scheme is 5000 units. Where an investor sells some units so that the remaining units held are less than the minimum holding of 5000 units, the Manager reserves the right to buy back the balance of the investment.

### **2. Suspension of Dealings**

The Trustee, or the Manager, with the prior agreement of the Trustee, may suspend the redemption of units if in their opinion, there is good and sufficient reason to do so having regard to the interests of unit-holders. But it must give notice (Repayment Suspension Notice) to the Financial Services Commission and the public in general by way of publication on the Manager's website. In such cases, dealings would recommence when considered appropriate by the Trustee and the Manager, who should give notice thereof to the general public in like manner.

### **3. Publication of Prices**

The issue and repayment prices of units will be published on the Manager's website. The prices quoted will be the prices derived from the previous valuation and should, therefore, only be used as an indicator of the likely issue and repayment prices.

## **(3) Net Asset Value**

The issue and repayment or redemption prices of units will be calculated by the Manager on the basis of the valuation of the property of the Scheme.

The issue price of a unit shall be the amount calculated according to the following formula:-

$$\frac{CV}{U} + \frac{ANI}{U} + ISC$$

Where CV = Capital Value of the Scheme plus brokerage, commission and other charges, if any;

U = number of units in issue;

ANI = Accrued Net Income from the date of the beginning of the current year to the valuation point;

ISC = Initial Service charge made by the Manager (not exceeding 5% of the issue price).

The repayment price of a unit shall be the amount calculated according to the following formula:-

$$\frac{CV}{U} + \frac{ANI}{U} - RF$$

Where CV = Capital Value of the Scheme less brokerage, commission and other Charges;

U = number of units in issue;

ANI = Accrued Net Income from the date of the beginning of the current year to the valuation point;

RF = Repayment Fee charged by the Manager (not exceeding 5% of the Repayment price).

The Manager is entitled to include an initial service charge in the issue price of a unit. Under the Trust Deed, this may not exceed 5% of the issue price of a unit. During the launch period of the Scheme, the initial service charge and the exit fee will be set at 1%.

Switching is carried out free of charge.

The issue and repayment prices of units of the NIT Emerging Markets Fund will be determined by reference to a 12.30 hours valuation of the property of the Scheme on every Thursday. But the Manager may alter the time of the valuation and shall give notice thereof at the registered office.

Valuation is carried out on a weekly basis. All instructions received at the registered office before 10 a.m. every day will be priced by reference to that day's valuation. Instructions received after the cut-off time will be priced by reference to the next valuation, i.e., the valuation of the following Thursday.

The price of the unit includes the net accumulated income receivable. At the end of the year, the accrued income, due for subsequent payment to unit-holders, is excluded from the unit price which is then quoted 'ex-div'. Buyers of units at this time do not get the current distribution, but sellers do.

#### **(4) Purchases and Redemptions**

Units may be purchased and redeemed directly from the Manager between 9.00 a.m. and 4.00 p.m on any business day. The unit price will be set on a forward basis, i.e., investors are not given any definite price in advance of the purchase or redemption.

(i) Issue/Purchase

Applications to purchase units may be made to the Manager. Once a completed application form has been submitted and payment remitted, units will be allocated at the issue price ruling on the next valuation day after the payment is received. A contract note will then be sent to the investor, showing the number of units purchased and the price. Units will be issued in fractions. Depending on the type of investment, a contract note may be sent, within 3 business days of the date of the transaction.

Units may be purchased for minors and can be registered in his or her own name, but may not be sold before the child's 18<sup>th</sup> birthday, except with the written consent of the guardian.

(ii) Redemption/Repurchases

Units may be sold back to the Manager, who is under the obligation to repurchase them, by sending to the Manager a written repayment request. The repayment or repurchase price will be determined on the next valuation day following the receipt of the Repayment request. Once the transaction completed, a Contract Note will be sent to the investor giving full details of the sale of units including the amount due to him. A cheque for this sum of money will be sent to the client within 3 business days of the date of the transaction.

(iii) Large Deals

Where a unit-holder requests redemption of a number of units representing not less than 5% of the value of property of the Scheme, the Manager is permitted to charge a repayment fee at the maximum rate of 2% on the repayment price.

## **(5) Management Fees and Other Fees and Charges**

The Manager is entitled to an annual management fee, calculated and payable monthly out of the property of the Scheme, by way of remuneration for its services. The Trust Deed permits a maximum annual management fee of 2% based on the value of the Property of the Scheme. This charge will initially be set at 1.5%.

The Trustee is entitled to an annual fee (payable quarterly out of the property of the Scheme) determined on the basis of a scale agreed from time to time between the Trustee and the Manager. The Trustee fee will initially be set at 0.1% on the value of the Property of the Scheme per annum subject to a minimum of Rs 60,000.00 p.a.

The Custodian is entitled to an annual fee (payable monthly out of the property of the Scheme) of 0.1% per annum.

The Act also lays down the obligation on “every bank, financial institution, cash dealer or member of a relevant profession or occupation” to report forthwith to the Financial Intelligence Unit (FIU) any “suspicious transaction”.
